Title    Injury Severity Score (ISS) as a Yardstick in Assessing the Severity and Mortality of various Abdomino-pelvic Trauma Hospitalized Victims – a clinical vis-à-vis autopsy study
Authors  Professor Dr. Bishnu Kumar, Assistant Professor Dr. George Paul & Dr Ashok Kumar Sharma
Abstract A summary of 51 cases of vehicular accidents showing abdomino-pelvic trauma, along with associated other regional injuries, were studied at the Department of Forensic Medicine, at MAM College and Associated Hospitals in New Delhi during 1996. A detailed Injury Severity Score (ISS) was done in all the cases and the relationship of ISS during their clinical treatment phase and after death were studied, keeping in mind factors such as age, survival periods, etc.
