Important Safety Information for Patients receiving Columvi® (*glofitamab*)

Patient Card

- Please carry this card with you at all times while you are receiving **Columvi® (glofitamab)**
- Show this card to any doctor involved in your care.

Information for the Patient

Contact your Doctor or get emergency help **right away** if you have **any** of these symptoms:

- Fever (100.4°F/38°C or higher)
- Fast heartbeat
- Chills
- Shortness of breath
- Feeling dizzy or lightheaded

Experiencing any of these symptoms could be due to **Cytokine Release Syndrome**, which requires immediate evaluation by a Doctor.

Cytokine Release Syndrome

- is a group of symptoms caused by small proteins called cytokines, released in your body during inflammation.
 - may be caused by receiving **Columvi® (glofitamab)**
-

Information for the Treating Doctor

This patient has received **Columvi® (glofitamab)** - which may cause **Cytokine Release Syndrome (CRS)**.

- Evaluate the patient immediately and treat symptoms.
- If CRS is suspected, please refer to section 2.2 of the **Columvi® (glofitamab)** Singapore Package Insert for further information on CRS management.
- **Contact the prescribing doctor** when possible – they may need to modify the next infusion of **Columvi® (glofitamab)**.
- For more information about **Columvi® (glofitamab)**, please refer to the Singapore Package Insert.
- Company contact point - Roche Drug Safety Unit at singapore.drugsafety@roche.com
