IMPORTANT INFORMATION FOR HEALTHCARE PROVIDERS

- This patient has received YESCARTA®, an engineered autologous T-cell immunotherapy product that can lead to severe and even fatal cytokine release syndrome and neurologic adverse reactions. Cytokine release syndrome may involve any organ system.
- **WARNING:** Cytokine release syndrome and neurologic adverse reactions. See the YESCARTA® Singapore Package Insert for full details.
- Assess the patient for signs and symptoms of cytokine release syndrome and neurologic adverse reactions.
- See the Healthcare Professional Educational Material on how to manage cytokine release syndrome and neurologic adverse reactions.
- **Contact the patient's treating physician immediately for further information.**

Patient Alert Card

Take this card with you if you go to the hospital or see any doctor other than your treating healthcare provider.

Be sure to tell all your healthcare providers that you are being treated with YESCARTA® and SHOW THEM THIS CARD.

MY TREATING HEALTHCARE PROVIDER CONTACT INFORMATION & DATE OF INFUSION

Name of treating healthcare provider: _____

Office phone: _____

After-hours phone: _____

Name & phone of patient: _____

Product batch number: _____

Date of infusion: _____

IMPORTANT REMINDERS FOR PATIENTS

- If you experience severe nausea, vomiting, diarrhoea, tiredness or any newly occurring symptoms, especially any of the symptoms listed on this card, please immediately notify your treating healthcare provider, or any healthcare provider available.
- Do not treat any of these symptoms with over-the-counter medications or herbal/dietary supplements without the approval of your treating healthcare provider.

YESCARTA® can cause serious side effects. These symptoms can be life-threatening or even fatal and need to be addressed immediately.

Symptoms that appear mild may quickly worsen.

Symptoms may be delayed and may occur weeks after your infusion.

CALL YOUR TREATING HEALTHCARE PROVIDER RIGHT AWAY IF YOU HAVE ANY OF THESE SYMPTOMS
