Importance of Good Submission

Importance of Good Submission

- **S - Speed** to Market
 - Faster approvals
 - Competitive advantage
 - Positive impact on company
- **T - Trust** Building
 - Inspire trust among stakeholders
 - Enhance the company's professional credibility
- **A - Assets** Optimization
 - Efficient use of resource
 - Reduced costs
- **R - Results** Delivery
 - Improved patient access
 - Establishes track record of successful submissions
 - Global market expansion

Pre-submission Planning and Strategy

A man with dark hair and a beard, wearing a grey shirt and a dark jacket, is completely surrounded by a massive, chaotic pile of white papers and brown folders. He has a pained expression on his face, with his mouth wide open in a shout or scream, and his eyes are squeezed shut. His hands are pressed against the papers in front of him, as if he is trying to hold them together or push them away. The background is a plain, light grey color, which makes the large pile of papers stand out. The overall image conveys a sense of being overwhelmed by too much information.

What should you do with so much information!!

3 Keys to pre-submission success in Singapore

- Know your device and regulatory pathway
 - Accurate device classification
 - Regulatory pathway selection
 - Understanding of guidance documents

Medical device registration and licensing tools

Use these tools to help you when registering your medical device and applying for a dealer's licence.

Is it a medical device

Check if your device is considered a medical device in Singapore.

TOOL

Risk classification tool

Find out the risk classification of your medical device for grouping and registration.

TOOL

Registration and licensing requirements

Find out the requirements for your device's registration route and whether you need to apply for a licence.

TOOL

Medical device grouping tool

Check if you can group your medical devices for registration.

TOOL

Guidance documents for medical devices

Here is the list of guidance documents with relevant forms and templates to help you meet the regulatory requirements for dealing in medical devices.

- ⊕ [Product Registration](#)
- ⊕ [Dealer's licensing](#)
- ⊕ [Change Notification and Amendments](#)
- ⊕ [Special Access Routes](#)
- ⊕ [Advertisement and Sales Promotion](#)
- ⊕ [Safety Monitoring](#)
- ⊕ [Technical Reference Documents](#)

3 Keys to pre-submission success in Singapore

- **Documentation Excellence**

- Submission Format – Common Submission Dossier Template (CSDT) or International Medical Device Regulators Forum (IMDRF) Medical device Market Authorisation Table of Contents (ToC)
- Technical documentation completeness
- HSA specific requirements (e.g. Letter of Authorisation, route specific documents)

- **Early Engagement with HSA (critical for new players)**

- Pre-Submission Consultation

Common Submission Pitfalls

Common Submission Pitfalls

Documentation

- Incomplete or inconsistent documentation
- Inconsistent terminology used
- Information/data dumping
- Missing essential safety and performance requirements

Communication

- Poor organisation of responses
- Inadequate responses to queries
- Not seeking clarification on queries

Lack of submission strategy

- Unaware of regulatory requirements
- Incorrect risk classification
- Wrong regulatory pathway chosen

Best Practices

Preparation and organisation are critical – a well structured submission means faster approvals

Strategic preparation

- Key milestone and submission timeline planning
- Device classification confirmation
- Regulatory pathway selection
- Gap analysis of available data
- Be upfront with the standards used
- Documentary requirements (Summary reports vs Full reports)

Documentation Excellence [CSDT]

- Ensure dossier is as per the CSDT format

General Medical Device

- GN17: Guidance on preparation of a product registration submission for general medical devices using the ASEAN CSDT
- TR01: Contents of a product registration submission for General Medical Devices using the ASEAN CSDT

In-Vitro Diagnostic Device

- GN18: Guidance on preparation of a product registration submission for In-Vitro Diagnostic Medical Devices using the ASEAN CSDT
- TR02: Contents of a product registration submission for In-Vitro Diagnostic Medical Devices using the ASEAN CSDT

Documentation Excellence [CSDT]

- Elements of CSDT (Con't)
 - Executive summary should be on **your medical device**
 - Device description: Help us to understand your device! Pictorials, labelled diagram.
 - Essential principles checklist & Evidence of conformity
 - Device labelling
 - Risk analysis
 - Manufacturer Information

Documentation Excellence [CSDT]

- Elements of CSDT (Con't)
 - Design Verification and Validation

Design Verification and Validation

[e.g. Biocompatibility, sterilization, software, shelf life, bench test, cybersecurity, sensitivity, interference]

- ✓ Clear documentation of test protocols and results
- ✓ Justification for leveraging existing V&V data
- ✓ Model representation justification
- ✓ Software
 - a. Version tested should be clearly listed in the report
 - b. Justification for version differences
 - c. Justification for anomalies should also be included if they remain unresolved.

Documentation Excellence [CSDT]

- Elements of CSDT
 - Clinical Evaluation

Clinical Evaluation

- ✓ Consider referencing to *GN20: Guidance on Clinical Evaluation*
- ✓ Clinical Evaluation Report (CER) should be clear and structured.
- ✓ Clear identification of equivalent devices and detailed comparison table showing equivalence.
- ✓ CER should not be a collection of literature. Ensure there are critical appraisal and quality assessment of the evidence.
- ✓ For IVD using method comparison as clinical evidence, the comparator used must have obtained marketing clearance from HSA and/or reference agencies (EU, FDA, TGA, HC and MHLW)

Documentation Excellence [CSDT]

- HSA documentary requirements

Letter of authorisation

- Follow the HSA prescribed template
- Product owner and registrant refers to company and not individual
- Signature used should allow for traceability to ensure authenticity

Annex 2 List of Configurations

- State grouping used
- Include medical devices to be registered in the application
- Excel Format

Safety and Marketing History Declaration

- Route specific requirements
- Declared and signed by Registrant
- Signature used should allow for traceability to ensure authenticity

Declaration of labelling

- State the reference agency (s) used and the route selected
- Declared and signed by Product Owner
- Signature used should allow for traceability to ensure authenticity

Documentation Excellence [CSDT]

- Submission
 - Name your file/document properly
 - Upload into the applicable sections in SHARE

- ✓  **Product Registration Application Dossier**
 - >  **1. Letter of Authorisation**
 - >  **2. Annex 2 List of Configurations**
 - >  **3. Proof of Reference Agency Approvals**
 - >  **4. Declarations**
 - >  **5. Executive Summary**
 - >  **6. Essential Principles Checklist and Declaration of Conformity**
 - >  **7. Device Description**
 - >  **8. Design Verification and Validation**
 - >  **9. Clinical Evaluation Report**
 - >  **10. Device Labelling**
 - >  **11. Risk Management**
 - >  **12. Manufacturing Information**
 - >  **13. Others**
- ✓  **101. Third Party Entity Supporting Documents**

Tips

- Be precise. Answer straight to the point
- Consolidate all responses into a single document (e.g. word, pdf, excel).
- Name your document properly (e.g. “Query2_Software Test Report“)
- Categorize devices into groups (e.g. abutments, screws) and use tables/spreadsheet to map the device categories and applicable documents.
- Check with review officers when in doubt.
- Subscribe to HSA regulatory updates mailing list

Key Takeaway

- Success Metrics: 3 Ps

Preparation

- Start Early
- Plan thoroughly
- Know the guidance documents

Precision

- Accuracy and consistency in documentation
- Clear identification of models, versions and methods tested
- Document deviations with clear justifications

Proactivity

- Anticipate questions
- Engage early with regulators
- Stay current with regulatory updates

Excellence in submissions isn't
about perfection - it's about
thorough preparation and clear
communication

THANK YOU
